SUMMARY

Intelligence and Crime Analysis graduate with military communications security experience, federally funded research experience, and a strong background in cybersecurity, intelligence analysis, criminal networks, and data-driven decision making. Four-year U.S. Army veteran experienced in handling classified information, secure communications systems, operational planning, and technical troubleshooting. Contributed to National Science Foundation research examining illicit decision-making within dynamic supply networks using agent-based modeling. Skilled in intelligence analysis, crime trend identification, ArcGIS, research methodologies, cyber investigations, and analytical reporting.

EDUCATION

California State University, San Bernardino

Bachelor of Science — Intelligence and Crime Analysis, Concentration in Cyber Security

Graduated: May 15, 2026

SKILLS

- Communications Systems
- Crime Network Analysis
- Metasploit
- Agent-Based Modeling
- Remote Site Support
- User Account Administration
- Joint Capabilities Release
- NetLogo
- Troubleshooting
- Cryptographic Management
- Technical Support
- UCI Net

EXPERIENCE

University Enterprises Corporation (UEC) at California State University, San Bernardino. National Science Foundation Research Project

Project: *D-ISN: Constraining Illicit Decision Making Within and Across Dynamic Supply Networks.*
National Science Foundation Award #2237907

Research Assistant

January 2026 – Present

- Conducted research examining illicit decision-making and criminal adaptation within dynamic supply networks.
- Presented analytical findings through written reports and research documentation.

- Developed and analyzed Agent-Based Models (ABMs) using NetLogo to simulate criminal decision-making processes and organizational behavior.
- Applied Red Queen Theory to analyze how firms adapt to enforcement pressures and changing market conditions.
- Assisted with data analysis, model validation, literature reviews, and research documentation.
- Collaborated with faculty researchers from California State University San Bernardino, Wake Forest University, and Ohio University.

U.S. ARMY, FORT HOOD, TX.

June 2019 – October 2022

Communications Security Manager:

April 2021 – October 2022

- Conducted inspections of five COMSEC vaults, including four subordinate organizational vaults, ensuring compliance with Department of Defense security requirements and operational standards.
- Investigated discrepancies involving communications security equipment and maintained detailed records to support regulatory compliance and accountability requirements.
- Managed Communications Security (COMSEC) operations and accountability for classified cryptographic equipment and communications systems in accordance with Department of Defense regulations.
- Supervised and trained 5 junior Encryption Device Maintainers within our department on how to effectively troubleshoot, maintain, and operate Encrypted devices.

IT Field Service Technician:

June 2019 – March 2021

- Installed, configured, and integrated communications systems into HUMVEEs, JLTVs, and STRYKER combat vehicles, transforming platforms from non-operational communication status into fully network-capable assets.
- Configured Joint Capabilities Release (JCR) systems providing GPS-based situational awareness, secure messaging, and operational coordination across military networks.
- Submitted and coordinated service requests for user account provisioning, computer activation, network permissions, and Common Access Card (CAC) access through enterprise support channels.
- Managed accountability and inventory of military computer systems, monitors, radios, GPS devices, satellite communication equipment, and associated networking hardware valued at over \$250,000.
